### AM Pascription			Status	Superseded
SMIOU01 SUI WRKGSISPLF/WRKGSIOUTQ Slow Open OWKGSISPLF and WRKGSIOUTQ were slow to open Selection check at the wrong point in the code resulted in poor performance on systems with many spooled files.  3M10002 PDF Odd Length Strings Truncated To Even OInadvertent trimming of odd length single byte character strings within CJK double byte *SCS spooled files has been corrected.  3M10003 PDS Page Buffer Functions Added OF Page buffer concept and supporting functions added. Page buffers allow out of sequence print data to be processed correctly by sequence oriented transforms such as txt, html, etc.  3M10004 FNT Retrive CCSID Function Added ONE wexport allows retrieval of a font stack entry's opinion on the current effective cosid.  3M10005 TXT Procesing Improvements  **TXTXXX transforms now support out of sequence data in a print data stream. O*TXTXXX transforms now support mixed CCSID data in a print data stream. O*TXTXXX transforms now support complex over printing of DBCS data as well as other enhancements to overlap resolution.  3M10006 SAM Add *TXTNONBLANK Transform ONew text transform *TXTNONBLANK, has been added. The transform compresses out all lines containing only white space. This processing is similar to that of the OS and i Access.  3M10007 PDS Internal Mods To Increase Modularity OF Internal modifications to increase modularity.  3M10008 PDF Intelligent Mail BARCODE Error OF Incorrect data in an internal Intelligent Mail table resulted in invalid barcodes being generated something like 1.5% of the time.  3M10010 PDS Page Buffer Handle DBCS ES!=x1301 OF Page Buffering enhanced to handle DBCS data with		_	mm/dd/yy	<u>By</u>
o WRKGSISPLF and WRKGSIOUTQ were slow to open Selection check at the wrong point in the code resulted in poor performance on systems with many spooled files.  3M10002 PDF Odd Length Strings Truncated To Even o Inadvertent trimming of odd length single byte character strings within CJK double byte *SCS spooled files has been corrected.  3M10003 PDS Page Buffer Functions Added o Page buffer concept and supporting functions added. Page buffers allow out of sequence print data to be processed correctly by sequence oriented transforms such as txt, html, etc.  3M10004 FNT Retrive CCSID Function Added o New export allows retrieval of a font stack entry's opinion on the current effective ccsid.  3M10005 TXT Procesing Improvements o *TXTxxx transforms now support out of sequence data in a print data stream. o *TXTxxx transforms now support complex over printing of DBCS data as well as other enhancements to overlap resolution.  3M10006 SAM Add *TXTNONBLANK Transform o New text transform, *TXTNONBLANK, has been added. The transform, *TXTNONBLANK, has been added. The transform compresses out all lines containing only white space. This processing is similar to that of the OS and i Access.  3M10007 PDS Internal Mods To Increase Modularity o Internal modifications to increase modularity.  3M10008 TXT Internal Mods To Increase Modularity o Internal modifications to increase modularity.  3M10009 PDF Intelligent Mail BARCODE Error O (6/04/20 3M10011 table resulted in invalid barcodes being generated something like 1.5% of the time.  3M10010 PDS Page Buffer Handle DBCS ES!=x1301 0 (6/04/20 3M10013 o Page Buffer Handle DBCS ES!=x1301 0 (6/04/20 3M10013 o Page Buffering enhanced to handle DBCS data with			05/04/00	211 0 0 7 0

Release . . . . . : **As of . . . . . :** 2022-06-03 Superseded Status PTF ID Description mm/dd/yy  $\mathbf{B}\mathbf{y}$ by \*HTMxxx and \*RTFxxx transforms. 3M10018 FNT Enhanced Equal CharSet Test 06/04/20 3M10072 o Test for equal char sets enhanced to look at the underlying \*FNTRSC and not the references, decreasing the number of false negatives. 3M10019 PDF \*FGID Imbed Changes 06/04/20 3M10071 o Previously PDFFNTIMB(\*FGID) looked for font resources in a list derived from the as shipped system font table. If no match was found, nothing was imbedded. Now if no match is found, Type 1 fonts present on every system are used. A font is always imbedded. o Previously multiple copies of a font imbedded for an FGID or for PDF/A might be included unnecessarily. Multiples are now avoided. 3M10020 QRC Libqrencode 3.9.0 Library Added 06/04/20 o Initial build. Portions of the Libgrencode 3.9.0 library have been compiled into a service program to generate QR Code barcodes. Libqrencode is a C library for encoding data in a QR Code symbol, a kind of 2D symbology that can be scanned by handy terminals such as a mobile phone with CCD. The capacity of QR Code is up to 7000 digits or 4000 characters, and is highly robust. Libqrencode supports QR Code model 2, described in JIS (Japanese Industrial Standards) X0510:2004 or ISO/IEC 18004. Due to the range of implementor choices provided in the QR Code standard (JIS X0510:2004 or ISO/IEC 18004), the symbols generated by Libgrencode and IBM i are not identical square for square even though they provide identical output from a scanner. 3M10021 PDF Enable QR Code 06/04/20 3M10071 o Barcode support has been extended to include QR Code. 06/04/20 3M10022 FNT Improved Unicode Generation 3M10072 o Previously when producing unicode mappings when code page \*FNTRSCs were missing from the system, CPGID=37 was used as a default. PTF ID	Description	Status mm/dd/yy	Superseded
	CPGID is used and accuracy increased for non		
21/1/00/2	CPGID=37 code pages.	06/04/20	21410071
3M10023	PDF Encoding and BARCODE Enhancements  o Font encoding when code page *FNTRSCs are missing from the system is enhanced. Previously a missing code page *FNTRSC was assumed to be CPGID=37 which gave erroneous results on non-US systems.	06/04/20	3M10071
	o Barcode processing enhanced:		
	<ul> <li>CODE93 now supported.</li> <li>DATABAR(GS1) now supported, except expanded</li> <li>Tye3 GS1.</li> <li>Interleaved 2-of-5 now supports modifiers</li> </ul>		
	0x03 and 0x04 (Bearer Bars).  - DDS *SWIDTH(symblo_width) parameter now		
	supported.		
	<ul> <li>Print emulation swicthed from IPDS to HPT resulting in slightly smaller barcodes.</li> </ul>		
3M10024	FNT OCRB Codepage Selection  o When OCRB was specified by FGID(3), an OCRA code  page was selected incorrectly. Now OCRB CPGID	06/04/20 e	3M10072
	2086 is substituted for the CPGID 340 generated		
3M10025	into the data stream and the error is avoided.  FNT Size Processing Corrected  o When font resources are substituted for FGID	06/04/20	3M10072
	fonts, the resource's notion of size now overrules the GRID specification. This restores the old, correct, behavior.		
3M10026	PDF *EXACTMOD Processing Corrected  o Text relative positioning *EXACTMOD was incorrectly treated as *EXACT when fonts were imbedded. The old, correct, behavior is restored	06/04/20	3M10071
3M10027	SCS Invalid VCS Channel Ignored o Invalid channel number in SCS control VCS (vertical channel select) was treated as a fatal error. Now the control is ignored and processing continues.	06/04/20	
3M10028	FNT CCSID From CP When CS/CP Fails  o When determining a CCSID for a font based on GCSGID/CPGID fails, an attempt is made to identify a CCSID based on CPGID alone. This restores the previous behavior.	06/04/20	3M10072

**As of . . . . . :** 2022-06-03 Status Superseded PTF ID Description mm/dd/yy  $\mathbf{B}\mathbf{y}$ 3M10029 PDF Enhanced DBCS Processing 06/04/20 3M10071 o Internal changes allow a print data stream's contents to determine when DBCS processing is required to correctly render a spooled file. Previously processing was driven by the target CCSID specified on the command. o Internal table mapping CCSID to Adobe Asian font name expanded to include SBCS CCSIDs used in ES 1301 mixed single and double byte CCSIDs. 3M10030 FNT Extraneous Error Messages Removed 06/04/20 3M10072 o Unicode map generation during code page \*FNTRSC resolution now suppressed when processing a single byte code page that represents an individual plane of a DBCS cpgid. This removes extraneous conversion failure messages. 3M10031 MSG New Export 06/04/20 o New export allows on the fly tuning of an existing message environment's diagnostic message delivery. 3M10032 SPL Quiet Resource List Resolution 06/04/20 o Resource list resolution has been modified to avoid diagnostic messages generated during resource searches. They were a byproduct of searching and misleading. 3M10033 PDF Limit Missing Resource Messages 06/04/20 3M10071 o Missing resource messages generated during processing limited to 12. PID Message File Updates 06/04/20 3M10034 o Add new application messages to message file for future enhancement. 3M10035 PID Upgrade RTVGSIPTF Command 06/04/20 o Previously, the Retrieve Gumbo PTF (RTVGSIPTF) command downloaded PTFs using the FTP protocol. Now RTVGSIPTF uses HTTP. Additionally, RTVGSIPTF can access the PTF server through a proxy server, if required by your network, using the new PROXY() parameter. We anticipate that some installations' networks will have problems accessing the PTF server over HTTP. On a temporary basis, RTVGSIPTF has

Release . . . . . : V3R1M0 **As of . . . . . :** 2022-06-03 Status Superseded PTF ID Description mm/dd/yy Ву introduced a PROTOCOL() parameter that allows you to switch back to the old FTP behavior while correcting problems with HTTP service. This parameter will ultimately be removed along with support for FTP as a transport mechanism. COMPATIBILITY WARNING HTTP is now the default protocol for PTF retrieval. If your network restricts HTTP access or if a proxy is required for HTTP access the RTVGSIPTF command will fail. If a proxy is required you must fill in the PROXY() parameter. Otherwise you will have to specify PROTOCOL(\*FTP) while you resolve problems with HTTP access on your network. 06/04/20 3M10036 FNT New Function Export 3M10072 o New export to allow retrieval of a font's Baseline Offset Default value. 3M10037 PDF Correct Type3 Size For Mapping 06/04/20 3M10071 o Certain raster fonts (ex. COSOCR12) contain a discrepency between the stated point size and the 'Baseline offset default' value. Sizing an Adobe builtin font using point size gave a result that was 'too small'. When the values diverge we now use 'Baseline offset default' to calculate size for the builtin giving results that better appoximate the printed page. 3M10038 PTX Track Overstrike/Underscore Positions 06/04/20

	any other means of determining CCSID. This		
	primarily affects DBCS spooled files.		
	o Font processing is enhanced to parse and use		
	information contained in font resources on		
	the system and only referenceing internal tables if the resource can't be found or		
	if the resource doesn't contain the needed		
	information.		
	o An internal change was made to avoid font		
	resolution until the time information is		
	needed, if ever.		
3M10044	PDF Improved Asian Font Mapping	06/04/20	3M10071
	o Internal DBCS font mapping table corrected and		
	expanded to include all CCSIDs that map to Adob	e	
	built-in Asian fonts. CCSIDs 290, 833, 836, 102	.7 ,	
	1364, 1399, 4930, 4933, 5123, 13121, 13124,		
	16684, 28709 were added and now AFPDS data in		
	these CCSIDs correctly map to the appropriate		
	built-in.

Release . . . . . . V3R1M0 **As of . . . . . :** 2022-06-03 Status Superseded PTF ID Description mm/dd/yy  $\mathbf{B}\mathbf{y}$ 3M10045 FNT Character Position W/ \*AUTO + \*EXACT 06/04/20 3M10072 o Incorrect character positioning could occur when imbedding \*AUTO was used along with text relative positioning \*EXACT or \*EXACTMOD. 3M10046 PDF DocStrings Improved 06/04/20 3M10071 o Document string processing was enhanced. If conversion of data to Adobe's document string encoding would result in an incorrect or invalid string, the string is converted to unicode instead. This corrects for rare and unlikely problems. For example, if a non-breaking space (x41) was included in the subject, it would display as a euro symbol. 06/04/20 3M10071 3M10047 PDF Add \*PREBLEND32RGB Processing o Added new \*PREBLEND32RGB PDF image process blending (PDFIMGPBL) special value. With it 32 bit CMYK images are rendered with a RGB color model in the generated pdf. This can improve the appearance of an image. 3M10048 PDF Add \*PREBLEND32RGB Processing 06/04/20 o Add \*PREBLEND32RGB Processing 3M10049 PDF Enable \*PREBLEND32RGB 06/04/20 o \*PREBLEND32RGB enabled on CHGSM1DFT command. 3M10050 PID Update Field Fix Manager 06/04/20 o Added field fix manager processing to delete resolved font resource users spaces, if requested by a PTF, in order to force regeneration. 3M10051 FNT Remove Typel Marker Fields 06/04/20 3M10072 o Type 1 font resolution now strips marker fields from the font program resulting in a pure pfb. This resolves a complaint from more recent PDF/A validators such as veraPDF, NOTE: Previously resolved font resources are moved to QRPLOBJ during application of this PTF in order to force their recreation. IFS New Export Added 06/04/20 3M10052 o New function to open (create) a file based on CCSID instead of CPGID added. This facilitates control over the created file's CCSID attribute.
